

## מפתח מושגים אנגלי

access specifiers	135	Object	173
<i>private</i>	135	Object oriented programming (OOP)	1
<i>protected</i>	166	overloading	88
<i>public</i>	135	overriding	169
attribute	3, 63	<i>package</i>	128
<i>class</i>	10, 61	polymorphism	178
<i>abstract</i> class	211	project	40, 263
subclass	13, 160	reference	75
super class	13, 160	String	125
type wrapper classes	187	<i>super</i>	168, 171
class variable	130	toString()	127
compilation	43, 270	UML	277
composed object	88	up casting	183
constructor	12, 70	variables	23, 38, 75
copy constructor	95	Vector	194
default constructor	74	workspace	263
Design	175		
down casting	184		
encapsulation	10, 135		
<i>final</i>	25, 132		
<i>import</i>	128		
inheritance	13, 160		
instance	11		
instance variable	129		
<i>instanceof</i>	186		
<i>interface</i>	234		
Java API	194, 272		
javadoc	154, 274		
JCreator	40, 261		
main	117		
method	21, 65		
class method	132		
instance method	132		
object	1
